Towards the evolution of astrology, upgrading astrology, into:-

Astrological Quantum Biology

Towards the evolution of astrology, upgrading astrology into astrological quantum biology Astrology has patterns of social behaviour that have been shown within the astrological signs since the Mycenaean culture who were the first astronomers, they calculated the distance of planets/constellations from planet Earth to the planetary constellations.

The patterns of social behaviour associated to each astrological sign corresponds to the astronomical constellation clearly shown within Greek astrology; also, Chinese astrology seems to be more precise because it has more emphasis on the moon cycles. However, Greek astrology is quite wrong in respects to the fact that the planets do not move around the planet Earth in actual fact the planets revolve around the sun within our solar system in accordance with astronomy.

Planetary interactions, meiosis, mitosis and cerebral-fluid Planetary interactions have an effect on meiosis and mitosis via solar interactions yet to be proven via quantum biology. Physiologically, quantum tunnelling and entanglement are generally thought as the mechanisms of planetary interactions, though other quantum interactions also transpire yet to be proven see question: -

Question for the Quantum-Biologists and Enzymologists: -

“How does a cerebral fluid enzyme hold audio and visual memory (e.g., a Chinese character); before, during and after transmission of neurotransmitter from one neuron to another neuron. A laboratory experiment is necessary; whereby simulated cerebral-fluid is within a petri-dish, containing neurotransmitters, neurons and enzymes with a control mechanism transmitting the neurotransmitter along the polarised neuron to the enzyme, and some mechanism to quantify and qualitatively compute how an enzyme holds memory, other than quantum entanglement and tunnelling; There is some other mechanistic unidentified phenomenon not yet known. If you have a reasonable hypothesis as to how, please do not hesitate to contact me at johnlawrenceking@bio-functional-foods.com for dialogue”.

The solar-space-weather is the measurement of electrons, photons and protons, the electrons coil after/during the magnetic moment together with the different quantum-flavours accounting for the colours red, blue and green quantum flickers/luminosity during a thermal dependent quantum kinetics that are most probably dependent in electron polarities and vis versa with quantum entanglement/tunnelling and some

other **phenomenon** not yet know *level* (see: - *A laboratory experiment is necessary*); thereby making photons via the magnetic moment and spiralling in a system similar to a spiralling-galaxy (*with an out-put of dark matter*). see figure 1a: - Figure 1a - Feynman diagram, (*there are an infinite number of Feynman diagrams that are graphical representations of equations*).

The Feynman diagram shows the Electron positron scattering (called the magnetic moment) where two electrons collide to produce a photon γ , given by two diagrams that represent two integrals that are electrons, and the intermediate photon is virtual (An integral and a value of its mass) i.e., not zero. γ is a symbol that carries the quantum numbers of the exchange (*but not mass*). The electron scattering exchange is qualitatively even, two protons repel (*though sometimes attract*) each other the results between are like and unlike charges that are different, as the two electrons collide a photon is emitted, the quantum electromagnetic

waves are indicated by γ that discharges to the other electron field (P. Richard (2011) - Feynman).

The above mostly refers to atmospheric physics, during day and night the sun and moon has quantum interactions. The sun interacts via solar flares that are hydrogen explosions from the sun, at night the moon reflects the suns light that quantum interactions; though as Earth move through (*via rotation*) the planetary-constellations, planetary-quantum-interactions occur. The planetary-quantum-interactions combine with global-consciousness and the sun and moon interactions affecting the physiology at quantum level; significantly for Astrology, Astronomy and Quantum:-

Astrology – over thousands of years astrology has shown social behavioural patterns allied with each planetary-constellation.

Astronomy - over thousands of years (since the Myer civilization) Astronomers have been calculating and observing the planetary constellations and quantum-interactions within the perceivable cosmological solar system; referred to as cosmology, **astrophysics/astrobiology** (*space tech*).

Quantum-Biology – Quantum-Biology is quite reascent it is the combination of the discipline of Physics, Bio-

chemistry and physiology to understand the enzymology (also epigenetics) and physiology of humans in a comprehensive way. Now, the combination of Quantum-Biology, Astronomy and Astrology will be a specialism of the three specialisms above with an objective to prove that meiotic, mitotic cell division and all physiology is affected via planetary-quantum-interactions; combine with global-consciousness and/or the sun or moon interactions affecting the physiology including cerebral-fluid at quantum level (*see: - A laboratory experiment is necessary*). The above combination would be an academic discipline one third of the study should involve laboratory research, a third theory and a third essays, dissertations, theses, depending on the level of study (Concepts thought of during 2002 by John Lawrence King).

Planetary-quantum-interactions the hypothesis is that planetary quantum interactions correspond with the constellations together with planetary interactions upon the physiology via quantum entanglement and tunnelling with some other unknown quantum phenomenon yet to be discovered (see question for the Quantum-Biologists and Enzymologists).

Meiosis occurs before conception during sperm and egg, utilising meiotic cell division; mitotic cell division occurs there with the nine months pregnancy and thereafter. Planetary quantum interactions influence

both male and female via both meiosis and mitosis throughout life from preconception into old age.

Thus, the planetary quantum interactions interact throughout life and is shown in social patterns of astrology; not astronomy, even though quantum biology shall eventually prove that the patterns in astrology are average reality for most, as to the question with reference to cerebral fluid quantum enzymic reactions, result in memory retention and transmission from one neuron to the recipient neuron; Therefore, the planetary quantum interactions and consequential quantum effects on the cerebral-fluid enzyme and resultant social patterns shall be proven and the quantum interactions, once the question specified for the quantum biologists and enzymologists has been answered. Assuming planetary quantum interactions are proven to have impact on the physiology, both enzymology and Epigenetics are affected with resultant patterns; within enzymology that would be cerebral fluid and immunological interactions and with epigenetics, the hypothesis is in a transgenerational way. Thereby, affecting both social patterns and transgenerational epigenetics, as quantum tunnelling interactions are known to interact, also with the DNA structure via quantum affiliate resulting in dynamic-chemical-affiliations during epigenetic interactions (KING.J. K - 08.01.2023)

Romantic suggestions linked with astrological-quantum biology Romantic suggestions linked with astrological quantum-biology would be very compatible and co-evolving mutual relationships would be long-lasting as the beneficial information provided via the new astrologers of astrological quantum-biology would be very precise, opposed to anecdotal information currently available from a system that still teaches the earth is the centre of the solar system of which is not true, the sun is the centre of our solar system (KING.J. L - 01.09.2023). www.functional-foods.info by John Lawrence King

A List of sciences inventions *(King,J,L 1980s up to 2023)*

- 1) **Digitised minimised DNA product**, to make electrophoresis obsolete (John Lawrence King - 2002) – concept given to Chinese government.
- 2) **RAM drive** (Random Access Memory drive) that became the Solid-State hard drive (John Lawrence King - 2002)
- 3) **Earthquake Dampening system** (John Lawrence King - 2003) a concrete & bacteria combination was developed.

4) **Satellite Energy generation and transmission to infrastructure, cars**

(only one battery needed), lorries, buses, streetlights....
(John Lawrence King – 2006 - also see N' 10 invention)

5) **Bio-Functional-gels** [Bio-functional-foods/Gels | bio-functionalfoods.com](https://www.bio-functionalfoods.com) (John Lawrence King - 2021)

6) **Microbial clouds precipitation** utilising synthetic biology to develop the correct bacterial species

(John Lawrence King - 2005); I wrote to the Botswanan government and a resultant research paper was undertaken:- Impacts of Saharan Dust Intrusions on Bacterial Communities of the Low Troposphere (2020, *Nature.com*)

7) **Energy generation via water-combustion** so to turn turbines for electricity generation. water combustion for cars, lorries, buses, trains.... Also, possible steady flame water combustion for central heating boilers/systems (John Lawrence King - 2006)

8) **Bio-Marker-watch** – fundamentally it is a smart-watch with additional functionality and graphs showing a person's Biomarkers for biological age not chronological age.

9) **Hybrid-Quantum-Motor** – based on a biological motor found within the mitochondrial inner cell wall and a Quantum-Vortex system combined to generate electricity; perhaps miniaturised to be integrated into satellite systems for Satellite Energy generation and transmission (John Lawrence King – 2002+ N' 4)

10) **Genetic-Tooth-Implants** - To be implanted into the gums/bone to grow in a natural way; the development would involve the growth of the nerves as well as the tooth itself so that as the tooth grows the nerves stimulatingly grow; the system would probably utilize morphogenesis. (John Lawrence King - 2014). There has been some research from Japan:- [World's 1st 'tooth regrowth' medicine](#)

[moves toward clinical trials in Japan - The Mainichi](#)

11) Idea towards Room Temperature Quantum Computing Utilizing light through a Crystalline three-dimensional-lattice-structure

(Graphical representation)

Crystalline three-dimensional-lattice-structure

whilst shaking the structure use ultrasonic sound, I hypothesize that the $1e^-$ (charge(s)) and $1e^+$ (charge(s)) during the w bosonic field whilst the light travels through the lattice structure together with the ultrasonic sound will create a gate system (0s & 1s) that could be utilised for both room temperature quantum computing and lattice structure databases systems.
